INDEX

Acetyl-phenylhydrazine, treatment of polycythaemia by, fate of elements removed from blood-stream during, 277.

Achlorhydria, anaemia, and subacute combined degeneration in pituitary and gonadal insufficiency, 195.

Acromegaly: and creatine-creatinine metabolism, 17; cerebrospinal fluid in, influence of, on urinary excretion of chlorides, 241.

Agranulocytosis, observations on, 35; secondary to toxic substances, 35; idiopathic, 37.

Amyloidosis, systematized atypical, with macroglossia, 181.

Anaemia: achrestic and aplastic, 143; in pituitary and gonadal insufficiency, 195.

Antiscarlatinal serum, concentrated, treatment of acute rheumatic polyarthritis with, 93; present position of salicylate therapy, 93; rationale for use of the serum, 95; its administration, 96; untoward results of administration, 108; results of serum therapy, 110; previous attempts to employ serum in acute rheumatism, 112; element of protein shock, 113.

Asthma-prurigo, psychological factors in, 367; study of asthma-prurigo personality, 369; observations upon the personality features revealed in play, 379; individual asthma attack, 384.

Blood changes, alterations in gastric secretion and correlated—studies in Graves' disease, 353.

Cardiac enlargement, hypertension and, prognosis following recovery from coronary thrombosis, with special reference to, 49.

Cardiac oedema, organic mercurial diuretics in treatment of, 321.

Cerebrospinal fluid, influence of, in acromegaly on urinary excretion of chlorides, 241; evidence of secretion of antidiuretic hormone into cerebrospinal fluid, 243.

Chlorides, urinary excretion of, influence of cerebrospinal fluid in acromegaly on, 241.

Choline esterase activity in nervous and mental disorders, a study of, 1.

Chorea, Huntington's, in South Wales, 403; symptomatology, 404; differential diagnosis, 406; hereditary process, 406.

Coronary thrombosis, prognosis following recovery from, with special reference to the influence of hypertension and cardiac enlargement, 49.

Creatine-creatinine metabolism, acromegaly and, 17.

Degeneration, subacute combined, in pituitary and gonadal insufficiency, 195.

Dextrocardia, isolated uncomplicated, 395.

Diuretics, organic mercurial, in treatment of cardiac oedema, 321.

Emphysema, heart in, 59; literature on morbid anatomy of, 60; literature on radiology of, 62.

Gastric secretion, alterations in, and correlated blood changes—studies in Graves' disease, 353.

Gee-Thaysen's disease, three cases of, 119.

Gonadal insufficiency, pituitary and, achlorhydria, anaemia, and subacute combined degeneration in, 195.

Graves' disease, studies in, I: Alterations in gastric secretion and correlated blood changes, 353.

Haemopoietic activity of the human liver, part ii, 143; preparation and clinical testing of liver fractions, 143.

Heart in emphysema, 59; literature on morbid anatomy of, 60; literature on radiology of, 62.

Huntington's chorea in South Wales, 403; symptomatology, 404; differential diagnosis, 406; hereditary process, 406.

Hypertension and cardiac enlargement, prognosis following recovery from coronary thrombosis, with special reference to, 49.

Hyperthyroidism, lipopenia of, 231.

Hypoglycaemia, insulin, observations on

site of antagonistic action of posterior pituitary extracts on, 157.
Hypothyroidism, mild, plasma lipids in the diagnosis of, 467.

Idiopathic agranulocytosis, 37.
Idiopathic steatorrhoea, three cases of, 119.
Influenza, lung changes in, 425; classification of cases, 427; pathological features of the lungs in fatal cases, 449; blood picture, 449; bacteriology of the sputa, 450; comparison of the lung changes of this series with those recorded in pandemic times, 456; relation between pandemic and inter-pandemic influenza, 458; role of bacteria in the lung lesions in pandemic times, 459; pure virus pneumonia, 461; bacteria and virus in the lung lesions, 462.
Insulin hypoglycaemia, observations on site of antagonistic action of posterior pituitary extracts on, 157.
Iron, large doses of, administered by mouth, fate of, 5.

Lipopenia of hyperthyroidism, 231.
Liver, human, haemopoietic activity of, part ii, 143; preparation and clinical testing of liver fractions, 143.
Lung changes in influenza, 425; classification of cases, 427; pathological features of the lungs in fatal cases, 449; blood picture, 449; bacteriology of the sputa, 450, comparison of the lung changes of this series with those recorded in pandemic times, 456; relation between pandemic and inter-pandemic influenza, 458; role of bacteria in the lung lesions in pandemic times, 459; pure virus pneumonia, 461; bacteria and virus in the lung lesions, 462.

Macroglossia, systematized atypical amyloidosis with, 181.
Magnesium content of serum in renal insufficiency, 87.
Mental, nervous and, disorders, choline esterase activity in, a study of, 1.
Metabolism, creatine-creatinine, acromegaly and, 17.
Morbid anatomy of heart in emphysema, literature on, 60.
Myelosis, chronic non-leukaemic, 253.

Nervous and mental disorders, choline esterase activity in, a study of, 1.

Oedema, cardiac, organic mercurial diuretics in treatment of, 321.

Pancreatic islet tissue, quantitative estimation of, 287.
Pituitary and gonadal insufficiency, achlorhydria, anaemia, and subacute combined degeneration in, 195.
Pituitary extracts, posterior, observations on the site of antagonistic action of, on insulin hypoglycaemia, 157.
Pellagra, porphyrinuria in, 305.
Plasma lipids in the diagnosis of mild hypothyroidism, 467.
Plasma phosphatase in disease, 211; in pathological conditions, 213: bone disease, 213; non-osseous conditions, 223.
Pneumonia, pure virus, 461.
Polyarthritis, rheumatic, acute, treatment of, with concentrated antiscarlatinal serum, 93; present position of salicylate therapy, 93; rationale for use of concentrated antiscarlatinal serum, 95; serum and its administration, 96; untoward results of serum administration, 108; results of serum therapy, 110; previous attempts to employ sera in acute rheumatism, 112; element of protein shock, 113.
Polycythaemia, fate of elements removed from blood-stream during treatment of, by acetyl-phenylhydrazine, 277.
Porphyrinuria in pellagra, 305.
Protein shock, element of, 113.

QRS Complex, second positive wave of, 301.

Radiology of heart in emphysema, literature on, 62.
Renal insufficiency, magnesium content of serum in, 87.
Rheumatism, acute, previous attempts to employ sera in, 112.

Salicylate therapy, present position of, 93.
Sera, previous attempts to use, in acute rheumatism, 112.
Serum, antiscarlatinal, concentrated, treatment of acute rheumatic polyarthritis with, 93.
Skin sensitivity in asthmatic and control subjects, observations on, 165; methods of preparation and standardization of extracts, 166; composition

of asthmatic group, 168; composition of control group, 168; relationship between naturally occurring sensitivity and sensitivity shown by skin tests, 171.
Steatorrhoea, idiopathic, three cases of, 119.

Therapy, salicylate, present position of, 93.
Thrombosis, coronary, prognosis following recovery from, with special reference to the influence of hypertension and cardiac enlargement, 49.
Toxic substances, agranulocytosis secondary to, 35.

Urinary excretion of chlorides, influence of cerebrospinal fluid in acromegaly on, 241.
